Free and fast download. No scam or virus. Download direct from www.4csc.net I have never understood people who use iomega hard drives, but I have to admit I like the company. That said, it is a little weird that they can put a hard drive in your computer without your permission. I suppose that the industry would like to get rid of the 3.5" HDD's that are common. I am not sure who makes the Easy to use 4 bay cable rack, but if you don't mind buying an extra piece, they work well. They look like they are made of stainless steel. You don't have to use the one that came with the case. I have to admit I like the hard drive rack that came with my case, but I was disappointed to learn that it was just a mockup. Your keyboard cable is long enough that it is difficult to store in the back. It is nice that it slides out easily though. The 3.5" hard drive adapter I have is a Universal drive. I have a 5.25" floppy drive and a 3.5" drive. I just popped in my DVD drive and it worked with no problems. I had to replace a flash drive though. I am now ready to throw my external hard drive out the window and buy an extra case. I can't stand being tied down to a location. I will need to make a decision about my Iomega Easy to use 4 bay cable rack. I bought a new keyboard, and I was disappointed to find out that the keycaps are very small. I have never been able to find a set of replacement keycaps in the dimensions that I want. I was surprised that the keyboard needed a case, and I was pleasantly surprised to find that the keyboard came with a slip cover. It is hard to tell if the keyboard is small because of the size of the case, or if the case is small because of the size of the keyboard. Thanks for the compliment. The keyboard looks good, but the case is a little small. I did like that there was a slip cover that would go with it. I think the case and keyboard are sold separately, and I am not sure what the keyboard is by itself. I bought a new Iomega USB mouse, and I wasn't sure what to expect. I have not had a mouse that had a usb receiver before, but I like that
