A: No there is no such driver. What you see is the hard disk of the operating system. There is no other driver for the hard disk (it's not a SCSI hard disk or a USB device, it's the hard disk). The installer just added it and displayed the resulting boot message. It's typical for many Windows installations. You can get the hard disk image by installing the Windows System Image Collector. Keep in mind that the boot message isn't necessarily the hard disk. It could also be the partition table, a firmware, a power management unit, or the MBR. Q: Why does my ng-app attribute not work on a link tag? Why is the code below not working when trying to display the address in the "Hello world" text of the page? It is not recognizing the ng-app attribute. This is my first Angular project. New Google Maps Example Hello 2d92ce491b
