We have designed and published hundreds of great tutorials and cracked software for windows 7, 8, 10 and Mac OS. Condensing functionalities Friday, June 27, 2010 In the context of our effort to make JavaScript-based programming easier to do by providing a common set of generic tools, the ES5 specification describes what is commonly referred to as an "accelerator" — or sometimes as a "condenser"— that compiles function/object-related code down to bytecode and runs it in much less time than without. All browsers that support JavaScript (not all do) and JavaScript interpreters such as node.js have this functionality. While this is certainly a useful tool, we shouldn't kid ourselves that the time savings on such tools are typically more than just noticeable — and they are certainly not like the time savings we can achieve by using a JavaScript
