MTOS 2.5.4.0 Crack.Q:
How to test R MySql
connection? I created an
automated script and it
needs to check connection
to the database. I need it to
connect to the database and

query for the version. I've seen the examples of this using a .net desktop project here: However I need this script to connect to a MySQL database. The first way I have tried to do this is to try to connect to the database on the command line. This did not work because I need to specify the port. I thought the following would work but it didn't: `#!/bin/bash MYSQL`

```
_SERVER_USER="user"
MYSQL_SERVER_PASS
="password" MYSQL_SER
VER_PORT="3306" MYS
QL_SERVER_DATABAS
E="randomDBname"
mysql -u "$MYSQL_SERV
ER_USER" --password="$
MYSQL_SERVER_PASS"
--port="$MYSQL_SERVE
R_PORT" -e "SELECT
VERSION()" -e "exit" I've
been trying to figure this
out for days. All of the
```

examples I've seen for connecting 1cb139a0ed
