Powell v. Allen Powell v. Allen, 395 U.S. 242 (1969), is a case in which the Supreme Court of the United States held that a state court conviction cannot be challenged by showing that the petitioner did not have the effective assistance of counsel because he or she was denied the right to appeal the conviction. The petitioner in Powell had been convicted of second-degree murder, had been sentenced to life imprisonment, and had been represented by the same lawyer in both the trial court and on appeal. The state court granted a motion to withdraw as counsel at the appeal stage. However, the appellate court did not replace the lawyer, and the court dismissed the appeal. The court of appeals denied a petition for a writ of habeas

Cut and Paste Shortcut: Ctrl-C Simplifies the user experience, as well as reduces the risk of accidental collisions. Insert or add a layer Shortcut: Ctrl-V You can add a new layer in a DWG file with just a few clicks of your mouse. Undo Shortcut: Ctrl-Z This function reverses the last action and you can get back where you were in the document. Undo to Redo Shortcut: Ctrl-Shift-Z This function undoes the last action and redoes the previous one. Change an object's size and position Shortcut: Ctrl-Shift When you move the cursor over a shape or an object, you can resize it. This is done by simply clicking on the desired part of the selected object. Erase or delete an object Shortcut: Delete This is the most important command. You can delete an object or shape, or even an entire layer, by selecting it and pressing the Delete key. Erase a shape Shortcut: Del You can quickly erase a selected object by pressing the Delete key. It is good to know that it works on all layers in the document. Erase a layer Shortcut: Delete This command is a general one. You can simply delete the active layer by pressing the Delete key. If you are sure you want to do that, you can always try again to deselect the layer, by pressing Ctrl+D. Select a layer or shape Shortcut: Ctrl You can easily select all objects inside the active layer, by pressing the Ctrl key. You can also select a single object inside the active layer by pressing the Ctrl key and holding it down for a couple of seconds. Select a group of objects Shortcut: Shift-Ctrl You can select groups of objects, which can be useful in order to delete the selected objects or modify their properties. Create an object from a selection Shortcut: Alt+Shift+X This command opens the context menu in order to access various functions related to the selected object. Open the context menu Shortcut: Shift+Ctrl+X You can access the context menu by clicking on the right mouse button, or by pressing Shift+Ctrl+X. Create a new shape Shortcut: Shift+Ctrl+C You can create a new shape by clicking and dragging the mouse. Insert a new shape Shortcut: 80eaf3aba8
