Power Retouching Photoshop retouching tools are a useful addition to Photoshop for image enhancement. They come with a few different types of brushes (see Figure 1-16). FIGURE 1-16: The Layer Brush is one way to retouch an image; the Airbrush tool is another way. The Layer Brush (see Figure 1-17) looks like a paintbrush, and it loads with color or strokes. You can use it to highlight areas and change colors, fade colors, or wipe away areas to remove unwanted elements. FIGURE 1-17: The

Layer Brush lets you add color with ease. The Airbrush tool (see Figure 1-18) works much like the Layer Brush but adds a line or gradient to the image. It can add a gradient to an existing spot, or it can paint a gradient where you click. The Airbrush tool is useful for making color gradients in a photo. You can use it to wipe away unwanted elements, such as wrinkles in clothing, out-of-place objects, or even wrinkles in a person's face. FIGURE 1-18: The Airbrush tool lets you add color to an image in an easy manner. The Magic Wand tool is a non-selective, pixel-based eyedropper tool that makes it easy to fill an area with a color or value. For example, you can use it to fill a yellow donut with yellow light

In 2016, Adobe Photoshop created a new edition, called Adobe Photoshop CC, that contains most of the features of the flagship Photoshop software. . See *Kramer v. Oregon School of Pharmacy*, 15 Or.App. 64, 507 P.2d 858 (1973); *Fabel v. Employment Division*, 52 Or.App. 467, 629 P.2d 1354 (1981). First, I believe the majority has improperly expanded the definition of the word "employment." I agree with the plurality that the legislature intended "employment" to mean any business relationship wherein the taxpayer has a "substantial stake." See Majority Opinion, at 5. Therefore, I join in the portion of the plurality opinion which defines employment as "any business or profession in which the taxpayer has a substantial stake." See *id.*, at 7. However, unlike the plurality, I would hold that "employment" does not

include service performed exclusively for a governmental unit. In my view, a number of factors indicate that the legislature did not intend to include a taxpayer's service performed exclusively for a governmental unit within the meaning of ORS 317.190(2)(d). ORS 317.190(2)(d) was included in the statute to reduce the burden that governmental units often place on taxpayers through the levying of taxes, the collection of taxes, and the expenditure of public funds. See House Committee on Revenue, Subcommittee on Revenue & Taxation, HB 2553, May 17, 1981, Tape 13, Side 7 (statement of David Coburn, Chairman of the House Committee on Revenue, Subcommittee on Revenue & Taxation). The legislature adopted the term "employment" to refer to

any business relationship whereby the taxpayer has a "substantial stake." See ORS 317.190(2)(d). The meaning of the term "employment" is ambiguous. Therefore, the statute is to be construed in a manner that gives effect to the legislature's intent. See *Buono v. Nettleship*, 291 Or. 765, 772, 635 P.2d 7 (1981). There are several types of tax exemptions available to taxpayers. The legislature has specifically provided exemptions under ORS 317.190(1) and 317.200(1) for taxpayers, and a taxpayer may also be entitled to other kinds of tax exemptions, such as those provided in ORS 317.202 and 317.203. See generally ORS 317.190 through 317.247 (enumerating specific provisions for tax exemptions). The legislature could have

exempted from taxation those who perform services exclusively for governmental units. However, it did not do so. This absence of an

Donald Trump is playing a smart game with his exaggerated, chaotic approaches to governing. He is playing hardball with a lot of Republicans, which is a smart play in politics. And he is gaining fans on the Left, which is a smart play in politics. He may be losing the Black Voters for Trump campaign, though. While most folks have figured out that Democrats are the racists, all that can be found is that the Black Community voted for Trump. We need a bold, coherent policy approach that allows us to take advantage of the voters who

want the jobs and the economy to work again. It will be better to have them as my constituents than it will be to have them as my enemies. But it will be better to win them over to my team than it will be to keep them at the margins. Ethanol inhibits the NK1 tachykinin receptor by a non-competitive mechanism. We have previously shown that ethanol has an enhancing effect on the accumulation of substance P (SP) in the dorsal horn of the spinal cord, via its non-competitive inhibition of the NK1 tachykinin receptor (1). The present study examines the actions of ethanol on the NK1 and NK2 receptors of the rat dorsal horn. First, in the isolated dorsal horn of the spinal cord, we examined the effect of ethanol on the NK1 tachykinin receptor by determining

the inhibition of [3H]SP binding. Ethanol at concentrations of 25 to 500 mM showed a concentration-dependent inhibition of the NK1 receptor. The K_i value was 150 mM. Ethanol pretreatment (30 min) reduced by 25 to 70% the specific [3H]SP binding to synaptosomes, with the IC_{50} value of 150 mM. The results obtained with the isolated dorsal horn indicate that ethanol is capable of inhibiting the NK1 receptor in vivo. Then, with the whole cell patch-clamp technique, we examined the effect of ethanol on the responses evoked in NK1 tachykinin-sensitive dorsal horn neurons by a concentration-response curve to SP (10-1000 nM). Ethanol (100 mM) reduced the maximum response, without altering the EC_{50} value, suggesting that it does not affect the affinity or the efficacy

of SP at the postsynaptic receptor. Interestingly, the proportion of desensitized cells was increased in the presence of ethanol (25-500 mM). Moreover, ethanol had no effect on the pre-
