The owner of this site cannot be held responsible for any loss or damage of funds or savings and investments made based on the information provided. Please view our full disclaimer. Bitcoin price ticker designed for PC, phone or tablet A price ticker for Bitcoin that blends with various desktop designs Product Name pcTicker BTC Author Renato Ortaça Description A simple and attractive Bitcoin price ticker designed for PC, phone and tablet. Its main features include an attractive design that blends with various desktop designs, an intuitive price update interval, and a possible integration with the Whonix Network. The screen was particularly good. It is bright and visible from most angles, however heat is an issue, particularly around the Windows button on the front, and on the back where the battery housing is located. My first impression after unboxing the Q702 is that it is a nice looking unit. Styling is somewhat minimalist but very effective. The tablet part, once detached, has a nice weight, and no buttons or switches are located in awkward or intrusive positions. What's New In?

If you are among the ones that have placed savings in purchasing Bitcoin, then it's highly probable you are monitoring your investment on a daily basis, browsing the web to check the transaction prices and assess the trends. Aiming to offer you live price information for Bitcoin, pcTicker BTC displays the information on your desktop, in a small window that resembles a stock ticker. A price ticker for Bitcoin that blends with various desktop designs pcTicker BTC requires no setup, and the price ticker is visible on the desktop as soon as you launch the application. With a black-based design, the ticker seamlessly integrates with any desktop design choice. It can be easily placed anywhere on the desktop using drag and drop. Set the price update time interval with a few clicks Right-clicking on pcTicker BTC reveals its main menu, which bundles its configuration options. You are free to choose the price updating time interval, which ranges from 30 seconds to 60 minutes. On the downside, there is no option to set your own time interval, meaning you will have to settle for the default options. With a single click, you can also update the price value on the spot. A price ticker designed for Bitcoin investors pcTicker BTC is not a complex application, but it should come in handy to Bitcoin investors. Transforming it into a more versatile cryptocurrency price monitoring tool, with options to keep an eye on the price evolution of more than a single crypto coin, would really add to its value. Version 1.05 (Released on March 14th, 2018) pcTicker BTC (Bitcoin ticker) Features: If you are among the ones that have placed savings in purchasing Bitcoin, then it's highly probable you are monitoring your investment on a daily basis, browsing the web to check the transaction prices and assess the trends. Aiming to offer you live price information for Bitcoin, pcTicker BTC displays the information on your desktop, in a small window that resembles a stock ticker. A price ticker for Bitcoin that blends with various desktop designs pcTicker BTC requires no setup, and the price ticker is visible on the desktop as soon as you launch the application.
