A: Just don't print anything and the decimal lines will become the same size as the LCD. If you want to see what they look like when they are of identical size, I suggest you use your own equipment and then adjust the size of the image before printing to make them equal size. I usually print in the 'fit' setting, which tries to make them all the same size; but it also means you will have to cut the files down slightly to accommodate your paper size. If you print a range of larger images, then after you are happy with them, you can easily make them the same size by simply cutting the side off when you print them. Q: If I choose no religion when creating an account, are my posts considered to be religious? Say I register to SE, and then later choose no religion. Does that mean my posts will be considered to be religious? A: In short, 6a5afdab4c
