This powerful app allows you to create an easy-to-understand website in minutes! Just add your graphics, content, and other elements and your website will be finished in seconds. You can easily control the look and feel of your website, simply by changing the colors and styles, to customize your website how you want it to be. The best part is that every website is completely customizable and can be edited and changed at any time, while you are using the app! You can also easily change the layout of the app to be more user-friendly, or create a different layout for mobile or tablet, or make custom themes to really enhance your design. And, for those who are looking for a more robust and full-featured editing app, the free version includes support for multi-page documents, a touch panel with autocorrect and autocapitalize, a full sized canvas to drag and drop your own components onto, and more. What We Offer: Customize your website's colors and style Built-in support for Apple Notes, Pages, or Microsoft Word formats Drag and Drop interfaces for a versatile layout Built-in syncing across all of your devices Completely customizable Editable in real time Google Map integration Free to try This is an all-in-one app that will help you organize, plan, and keep track of your family, friends, and any other people in your life. While it's possible to create a calendar using a separate app, the Family Organizer will sync everything together for you, so you won't have to keep track of what dates your various calendars are set to. You can create multiple calendars to organize your schedule. While it's possible to manage your calendars separately, the Family Organizer has a simple but powerful integration that will allow you to keep an eye on your event by adding them to a calendar right from your

iPhone or iPad. When you make a change to an event, the app will automatically update your other calendars. What We Offer: Synchronized across all your devices The ability to create multiple calendars Create events from the calendar in the app Calendar sync Touch panel with autocorrect and autocapitalize Controls for priority, whether an event has reminders or not, and which event type Clear at any time Easy to use Free to try It's simple, it's powerful, it's designed to be used by anyone! Whether you are a beginner or
