What's New In?

Duplicate File Finder (DFF) for Windows is an advanced file finder, viewer and manager that is fast, reliable, light in resource usage, and offers a wide choice of advanced features. DFF is based on the same technology as the popular Duplicate Files Fixer for OS X, which it is based on the same detection mechanism that allows the Duplicate File Finder to find duplicate files, and shows duplicates in a standard viewer. DFF fully supports the analysis of duplicate files in terms of file type, file size, and modified data. DFF displays a view of the files found using a traditional list view. DFF displays two similar duplicates: -- The one that was modified earliest/most recently, and -- The one that was modified latest/least recently. DFF search tree view: -- The typical tree view, with file paths that are fully hierarchical and also the file modification date. -- A summary view of the search tree is also possible, if all the files/folders in the tree are being shown. DFF may also be used in two ways: 1) DFF may be used as a file finder. There's an option to search for the files in your system. 2) The file details may be used to browse through files. Each file is displayed with the path, modifications, attributes, details etc. DFF may be used as a file manager: -- DFF may be used to show the files in the directory. -- DFF may be used to delete the files. -- DFF may be used to rename the files. -- DFF may be used to move the files. -- DFF may be used to copy the files. Summary: DFF for Windows is a fast and compact disk and file search, analyzer, viewer, and manager. It is an effective, user-friendly tool that fully supports the analysis of duplicate files, based on file size, type, and also modified data. Duplicate Files Finder displays two similar duplicates: -- The one that was modified earliest/most recently and -- The one that was modified latest/least recently. It's a powerful tool for both novice and expert users. About the provider Duplicate File Finder by Ertons is a small tool that can easily find and eliminate duplicate files by doing a full scan of your computer. The main tool can be used to scan your main folders.
