Insane and amazing things, the things we do when we are finally away from our desktops. When we are in fact out of our comfort zones, we are always looking for ways to make things a bit easier and to solve all those problems that we're usually stuck on a daily basis. This is the case with a number of startups that have been able to launch some products that couldn't have found a place on our personal computers a couple of years ago. Here are some of the coolest ways of working that we've discovered after the last year. Dramatically improve the way you use text as it appears on your desktop. The keyboard is currently your closest ally, but the simple fact that most individuals are still typing texts with the mouse implies that there's a lot of room for change. Actually, there's a lot of room for improvement in the manner of data representation and interactivity, because people tend to use desktop applications as nothing more than text editors that happen to feature a support for graphical elements. Think about all the instances where you are still using classic simple text editors, such as Windows Notepad or OS X's default TextEdit, instead of the numerous options that are available for office-savvy individuals. For this reason, we are always on the hunt for the new ways of text storage and representation that will allow us to more effortlessly get data out of the programs we use. On paper, Alpha Key Saver Crack seems to be the answer for those individuals that use the Alt-key for text pasting operations but often find that they need to do that three or four times for a document. It's a small utility that is able to greatly simplify the process of data pasting and to add a small utility to the taskbar that can help you eliminate instances of repetitive typing. It would be fair to claim that the software was an idea that already exists in terms of 09e8f5149f

Alpha Key Saver is a small software application whose purpose is to help you store commonly used text records and make use of a hotkey in order to paste them in different windows. It also features support for a spell checker and password manager for storing passwords and account information. This tool comes in handy especially when you need to insert repetitive text in your email messages or other documents without having to re-type data. Clean design You are welcomed by a straightforward layout that allows you to create a database where you can store text items so you can reuse them on the fly. Creating a new database can be done by providing information about the filename and saving directory. You can also consult a help manual in case you need extra assistance with the configuration process. The utility runs quietly in the system tray until it gets activated with the mouse or hotkey. Store text items with ease Alpha Key Saver gives you the possibility to organize text records that you frequently use into custom categories. Adding a brand-new text item to the database can be done by selecting the preferred category from a drop-down list, adding a description, assigning a user-defined hotkey for quickly pasting the text, and specifying the target text. What's more, you are allowed to manually type in the text or paste the information from the clipboard, save text with formatting options, make use of a spell checker to identify possible errors, remove formatting, load data from RTF or plain text files, as well as insert time and date macros. Other important options worth being mentioned enable you to assign custom hotkeys to show the main screen, open password value, and apply spell checking capabilities to the content of the clipboard, as well as store data about accounts (
