User reviews Oct 16, 2011 BT Watcher Pro Review Concerns about system stability and functionality BT Watcher Pro version 1.5 is a really good program that manages Bluetooth tracking and some other services. I did a lot of tests and I recommend it for its stability and speed. The main concern I had is that it isn't really reliable. Sometimes I'd come to find out that all the notifications that BT Watcher had issued were lost somewhere between my laptop and the device. Fortunately for me, they were easily restored using the backup function. BT Watcher Pro

version 1.5 is a very good program. As a professional, I decided to take the plunge and I must say that the program is well worth it. If you have a business environment that relies on Bluetooth, then you should try this program out. BT Watcher Pro - What makes the software unique and different from other Bluetooth programs? The main features of BT Watcher Pro are: - Install a new application and it will automatically be displayed on the device's 77a5ca646e
