Ruler's Strain Calculator is a simple tool to calculate the alcohol content in different beers. It does not take measurements, though. Instead it uses the information about alcohol in wine, cider, beer, and spirits to give a quick estimate of the alcohol content for these drinks and typical beer brands. The program is written in C++ and uses the Qt libraries. License: Strain Calculator is free for non-commercial use. Other users can download the program and use it for free in their own projects, as long as they do not sell it. Please cite this article as: Strain Calculator. Software downloads related to Strain Calculator Turn It!Homebrew Beer CalculatorSimplified Calculations for Beer Recipes, Homebrew, and Patience The Wine SimulatorEnterprise software for winemaking and wine tasting. Copyright notice: This project has been placed in the public domain. Software downloads related to Strain Calculator BeerCalc!Beer calculator for personal use Simple Beer CalculatorThe simplest beer calculator to use. Healthy Beer Calculator: Type of drinkable carbohydrate content and degree of fermentation are calculated automatically. The results are displayed in HTML format. A search function lets you easily adjust the results to the requirements of your choice. Motorola Grouper: What was?Download Motorola Grouper and find out. Godiva Chocolate Calculator 1.0A candy Chocolate Mill to calculate how much chocolate coating and candy is needed to finish a candy bar. You can adjust the chocolate coating amount to finish a candy bar before it is melted. Strain Calculator 1.1.0.0The most accurate source of the alcohol content of various beverages in the world. What is the alcohol content of a typical beer? How much alcohol does it have? Or how much alcohol is in a bottle of wine? Please note that the program is for non-commercial use only. Strain Calculator 1.1.2.0Strain Calculator is a simple tool to calculate the alcohol content in different beers. It does not take measurements, though. Instead it uses the information about alcohol in wine, cider, beer, and spirits to give a quick estimate of the alcohol content for these drinks and typical beer brands. License: Strain Calculator is free for non-commercial use. Other users can download the program and use it for free in their own projects, as long 3e33713323
