MyTourbook is a powerful application that allows you to view and analyze tours recorded with various GPS devices, bike or ergometer computers, or a smart phone. The program provides a complete set of tools, allowing you to view detailed statistics about your performance, display photos, segment and analyze tours, as well as manage multiple user profiles. It is a complex program that offers a complete set of tools, allowing you to view detailed statistics about your performance, display photos, segment and analyze tours, as well as manage multiple user profiles. Add multiple people to the program's database If you want to accurately analyze data, you need to insert correct information for each person performing a particular workout. You can insert their name, age, gender, height and weight. It is also possible to customize HR zones, which are calculated based on provided physical attributes. View and analyze data in with the help of tour charts The application supports multiple tour formats, recorded with various devices. These include CRP, CSV, DAT, FIT, GPX, HRM, PDD, CRS, XML and more. MyTourbook can display recorded data or calculated values in chart form. These include altitude, pulse, speed, power, temperature, gradient, cadence and HR zones. Multiple graphs can be overlaid, to help you analyze different data sets. You can easily zoom in or out and specify if distance or time should be displayed on the x-axis. Well-designed interface, but lacks detailed instructions MyTourbook is a complex tool, but features a modern and customizable interface, allowing you to choose which windows are displayed, depending on the actions you need to perform. However, some users may have difficulties getting to grips with its more advanced functions. It would help if the program offered a built-in help function and more detailed documentation. All in all, this is a useful application for people who wish to view and analyze tours recorded with various devices. It offers a wide range of tools, but it may take some time for new users to learn how to take advantage of them. Other reviews from the web 4 stars out of 5 -- "Add multiple people to the program's database" and "View and analyze data in with the help of tour charts" The first thing I notice about MyTourbook is that the application offers a wide range of tools. After you perform a workout, it will create a report that lists the title, duration, distance and altitude. The
