What's New in the AutoCAD?

Simplify your editing and design workflows with the new Add to Dashboard feature. Get helpful tips and work faster by exporting and importing your design elements and content for later use. (video: 1:40 min.) Work smarter and faster with drag-and-drop features like editing within grids. Plus, rotate, mirror, and scale your drawings more quickly. (video: 1:40 min.) Create custom-sized printout grids for your drawings. You can also use the same or a different grid for annotations. (video: 1:37 min.) Simplify your design workflows with the new new Markup Import and Markup Assist. Import feedback from printed paper or PDFs and add changes to your drawings automatically, without additional drawing steps. Add to Dashboard: View all your design elements and content in one place and get helpful tips and access to new content when needed. Track your design elements and content and easily re-import them into your drawings and shared folders. Now you can save your design elements as an annotation and quickly add it to a new drawing from within AutoCAD. (video: 2:03 min.) You can also view and save feedback from existing designs by converting AutoCAD annotations into comments. (video: 2:02 min.) Redesign Your Workspace: Automatically select the workspace type that fits your needs and save the choice for future use. Now when you open a drawing, a Quick Analysis will present you with the best choice to work efficiently. AutoCAD now has more flexibility to work better with the new multi-document interface (MDI). You can now display multiple views in the same drawing window, and you can preview the drawing in a new MDI view. (video: 1:33 min.) You can now create a new layer for each multi-document region, and a separate view for each layer. The new multi-object snap feature gives you the ability to snap to groups of objects and edit multiple objects simultaneously. You can now right-click and scroll in the drawing window to quickly switch between objects in a drawing, as well as the Quick Info, tool palettes and commands that appear in the ribbon. Improved Performance: These updates are intended to deliver high performance and usability when working with AutoCAD.
