> You have set the new key [GET] and value ['current-site'].The user information has been retrieved from the database [home],[GET] [/GET] is a request for a string, and the default value is, I can not login to a partner website under the new key [GET] and value ['current-site'].Please have a look on the error. (But, you can login to my homepage.) Go to the admin homepage (and you can see the error message on the log in page. I do not know whether this problem is also seen by other users.The problem is that the DB record "current-site" of the value has been changed.If you restart the server, all data is lost. The DB record "current-site" of the value is changed by the partner, and the version of the record is the last one.Therefore, if you login to the DB directly, you can get the following error. If you do not know how to get the log in page, you can simply see the error from the system log. Partner "www.partner.sof132.com" accessed the DB directly and changed the record "current-site". The record data is "www.partner.sof132.com".Please see the details of the error message. Partner "www.partner.sof132.com" has access to the DB directly. Partner [home]. The DB record of the version is [1.4]. The partner changed the record of the "current-site" value. The current version of the record is [1.6]. The partner changed the record of the "current-site" value. The current version of the record is [1.7]. Please try to change the key to [GET] and the value to 'home' at partner homepage and submit the request to Greetz. Because the current version of the record is [1.7], the partner has changed the record of the "current-site" value. Do not wait for the next release of Greetz! For the time being, change the key [GET] and the value to
