
Cccam Converter V1.1 24

February 28, 2011 - Version 1.1 ---- - Fix double cccwantemu setting in oscam.server - Added checkbox to use old account setting (account=username,password). When using the old oscam.server variables, new entries for the old oscam.server variables will be added to the sc.ini file. - Now, if you want oscam.server to process only one account, you need to specify the value 1 for the account=username parameter. Previously, you had to specify the account=password parameter for this, but now you can omit this. - Correction when working with oscam.server, when using one account in several sessions. â€” Bug fix when working with OSCAM.
